ROSES

1935 Supplement to 1934-35 Catalogue

S. BRUNDRETT

The Rose Farm, Narre Warren North, Vic.

IMPORTED NOVELTIES for 1935.

(The descriptions are those of the raisers.)

AMALIA JUNG, H.T. (Leenders).—Vigorous erect growth, flower large, full and most highly Centifolia perfumed. Colour brilliant crimson red. A magnificent dark red rose. Gold Medal, Saverne. Certificate of Merit, R.D.S. and H.A.B. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

CHARMER, H.T. (A. Dickson).—The colour of the bud is glowing cerise, gradually emerging into a yellow zone on the reverse. Developed bloom, light rosy pink shading to yellow, inner side Rose Neyron, red shaded orange with a yellow base. Large, moderately full, long flowers with high-pointed centre. Vigorous and free blooming. Pronounced sweet tea fragrance. Gold Medal N.R.S. Award of Merit R.A.S. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

CONTESA DE SASTAGO, Pernet (Dot).—An absolutely sensational novelty with bicoloured flowers. Very erect, robust and vigorous growth, with large glossy green leaves. Golden yellow bud opening into a well-formed bloom. The heavy petals open out easily and show a very new and frank colouring. Andrinople red inside, golden yellow outside. This magnificent Rose should have a big success on account of its quite novel aspect. Fragrant. First Certificate Bagatelle, First-Class Certificate N.R.S. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

DR. W. E. HADDEN, H.T. (McGredy).—Bright raspberry red, heavily streaked and flushed yellow. Towards the base the colour gradually deepens to an orange yellow, showing off the blending of colours to perfection. The flowers are of average size, fine form and moderately perfumed. The habit of growth is vigorous, very free and branching, with dark green mildew-resistant foliage, quite distinct from any other Rose. The stems are long and strong, with few thorns. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

Nigrette and Princess of Orange are outstanding.

E. V. LUCAS, H.T. (McGredy).—Dark velvety crimson blooms which do not fade. In the bud stage it is a perfect button-hole Rose and the large, semi-double blooms (averaging fourteen petals) are borne in sprays and produced in great profusion throughout the entire season. The flowers have a faint "tea" perfume. The habit of growth is free and branching, breaking freely and vigorously from the base and every eye. A special feature of this Rose is the freedom of growth and abundance of flowers produced on long stems with dark green leaves and few thorns. Certificate of Merit N.R.S. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

GEHEIMRAT DUISBERG, H.T. (Kordes).—Seedling from Rapture and Julien Potin. Growth in every respect like that of Ophelia but for the glistening foliage. The colour is a suntrue deep yellow as is found in Julien Potin. $\frac{3}{4}$ Standard, 6/-; Dwarf 3/6.

KIDWAY, H.T. (Pernet Ducher).—This variety is remarkable for the beauty of the flower and foliage. It is most floriferous and continuous blooming and will rank amongst the most beautiful. The flower is full, of perfect form, and carried on rigid stem. The colour is sun yellow, striped and shaded orange. Growth robust, handsome foliage, disease resisting. A superb Rose. Accorded the Most Beautiful Rose of France (Concours Lyon). $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

MARIANNE, H.T. (Krause).—Colour a mixture of coppery orange, pink and red; pointed bud; bloom fairly large, of fine form and high-pointed centre. Vigorous, bushy, erect growth; bright green, disease-resisting foliage; profuse and continuous in bloom. Sweetly scented. A really good Rose, somewhat resembling "Rev. Page Roberts" in colour, but there is more red in it and the growth is more upright. Award of Merit N.R.S. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

McGREY'S TRIUMPH, H.T. (McGredy).—Geranium red, flushed orange, gradually deepening to rich orange at base. The flowers are very large, full, and of perfect shape, with a delicate rose scent. In addition to the brilliant and unusual colouring of the flowers, the extraordinary freedom and habit of growth are something far from the everyday Rose. We have at last produced the ideal habit Rose, with wonderful foliage and flowers, so outstanding and different from any other Rose in commerce that we have given it the above name. First-class Certificate N.R.S., Gold Medal N.R.S., Award of Merit Glasgow Horticultural Society. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

McGREY'S WONDER, H.T. (McGredy).—An entirely new colour break in Roses, reminding one of the brilliant orange shades seen in double Begonias. The colour is brilliant coppery orange, with a faint orange red flush towards the edge of petals; the outside of the petals has a deeper tinge of orange red. The flowers, which have a "fruity" perfume, are large, pointed, of good form, and moderately full. The growth is vigorous, upright, and all that could be desired, breaking freely and bearing blooms in great profusion. First-class Certificate N.R.S. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

Nigrette and Princess of Orange are outstanding.

REMARKS OR INSTRUCTIONS

MRS. ANTHONY SPALDING, H.T. (McGredy).—Strawberry red, flushed orange, and heavily veined claret; the outside of petals heavily overlaid russety orange. A brilliant and attractive colour. The flowers are large, full and of good shape, the petals reflexing in a manner which makes the flower beautiful. Its fragrance, though not very strong, is sweet. The habit of growth is distinct, being very free, vigorous and spreading; the blooms are borne freely throughout the entire season on long stems. Certificate of Merit N.R.S. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

MRS. E. WOOD, H.T. (A. Dickson).—Light buff yellow, delicately tinted yellowish salmon, developing to a cream yellow. Exceptionally long bud; large, well-formed flower. Vigorous, hardy, and free flowering. We do not know a Rose of this type which will produce such masses of bloom right through the season. Although the colour is not outstanding the flowers have a distinct charm and fragrance. This Rose has proved its excellence over an extended trial. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

NIGRETTE, H.T. (Krause).—Colour velvety black without any shading. The darkest of all Roses in commerce. In bud state almost black. Bud medium size, pointed; bloom full, good size and form, opening well in all weathers; petals deep and wide; foliage bright green, graceful and abundant. Very bushy, free-branching growth, blooming profusely and continuously. Sweetly scented. This Rose has caused a sensation wherever exhibited. It is the result of a cross between two of the darkest Roses, viz., Lord Castlereagh and Chateau de Clos Vougeot. No other Rose possesses such free-flowering qualities as "Nigrette." Every little eye brings a bloom. An ideal Rose for massing and bedding. Certificate of Merit German Rose Society, and patented in U.S.A. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

PRINCESS OF ORANGE, Clg. Poly. (De Ruiter).—This is the climbing form of the so-much-demanded "Gloria Mundi." Different to the other climbing forms of Polyantha Roses, it does not flower on the maiden plants, but flowers like other rambler Roses on the one-year-old wood. This habit ensures a tall growth. Was shown for the first time at the Spring Show in Rotterdam, April, 1932, and was given the highest award—a First-class Certificate—and an extra Prize of Honour. 3/6.

REWARD, H.T. (A. Dickson).—Bud deep buff yellow at the base, gradually becoming shaded with rose and toning to pale rose at the edge. Flower inner side rosy white, tinted cerise, with a large orange yellow disc at the base. Outer side light rose over buff yellow, developing into a delicate yellowish salmon, with flesh edges. Long, pointed, moderately large; very decorative flower of deep spiral form. Vigorous free-blooming and sweetly scented. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

RHEINGOLD, H.T. (Leenders).—Flower golden yellow, large, full, and strongly tea scented. Growth vigorous and compact. Large, oval green foliage, very floriferous. A magnificent Rose. Silver Medal Zeist. First-class Certificate Belgian Rose Society. Gold Medal Saverne. Prize of Honour Brussels. $\frac{3}{4}$ Standard, 6/-; Dwarf, 3/6.

Nigrette and Princess of Orange are outstanding.

ROSETTE, H.T. (A. Dickson).—Colour glowing rosy-red, lightly shaded orange with a yellow base. Full, fairly large, well-formed flower. The petal is wide but rather short. Vigorous, free blooming, and sweetly scented. A thoroughly good garden or bedding variety of reliable growth, carrying heavy crops of bright flowers late into the autumn. $\frac{1}{2}$ Standard, 6/-; Dwarf, 3/6.

New Australian Roses.

JOHN CRONIN, H.T. (Alister Clark).—This Rose possesses a great constitution and makes a large bush well furnished with healthy foliage. It blooms continuously and carries its large, well-shaped flowers upright. The colour is rich rose, and as it is such a fine grower it should thrive in all situations. Dwarfs, 2/6 each.

MRS. J. T. McINTOSH, H.T. (J. T. McIntosh, Prahran).—Colour creamy apricot; centre deeper apricot; base of petals golden yellow. Flowers large, full and well-formed. Vigorous and erect habit and very floriferous. A Rose of very high quality Dwarfs, 2/6 each.

Certificate and Gold Medal N.R.S. Vic.

SOMETHING NEW IN

Weeping Standards.

I am making available to my clients this season, for the first time in Australia, 4 ft. weeping standards of the variety "THE NEW DAWN."

This variety is the only one in commerce which possesses the combination of an ideal weeping habit of growth with the ability to keep flowering throughout the Spring, Summer and Autumn months. It was the first variety to receive a plant patent in U.S.A., and was introduced in Australia for the first time in 1933. The colour is flesh pink and the flowers are long, pointed and fairly double and freely produced.

Price: 4 ft. Weeping Standards, 7/6 each.

TESTIMONIALS

(Received unsolicited.)

"The Roses duly arrived in splendid condition, beautifully packed, and are really fine plants."—Auckland, New Zealand.

"I must thank you for the prompt and efficient manner in which you attended to my order, and for the way in which the Roses were dispatched. They arrived in excellent condition."—Coburg.

"I was more than satisfied with the Roses, and must congratulate you in having raised such healthy plants, also the care taken in the way they are packed for delivery."—Coburg.

"The standards arrived in perfect condition. With your packing one never worries in anticipation of the plants arriving in a withered and dried up condition."—Weering.

"I must say the 600 Rose plants you sent me were an excellent lot, and not one was lost or broken—surely a record."—"J.P.," Glen-Innes, N.S.W.

"They were an exceptionally fine lot of plants, and out of the hundred Roses in the order there was not one of inferior growth. I am very pleased with them."—"E.F.C.," Elsternwick.

Nigrette and Princess of Orange are outstanding.
